

Fact Sheet: Mississippi Cares Proposal

We believe that this proposed public-private partnership will:

- Pump more than \$1 billion per year into Mississippi's economy
- Create 19,000 jobs
- Improve personal income by over \$600 million
- Increase general fund revenue by \$50-100 million a year.

Hospital investments and member payments fund the premiums for Mississippi True with no state funding required!

This is a non-partisan proposal that will help all Mississippians. Over the next ten years, it will provide billions of dollars in additional state revenue. *Think about what that can do for our state – for our roads and bridges, for our teachers, for our colleges, and for our children.*

It is time to reform Medicaid!

Under a Medicaid waiver request, Mississippi hospitals would be willing to make an additional investment in premiums needed to fund insurance coverage through a hospital owned provider sponsored health plan.

This plan would essentially be an insurance policy paid for by hospitals along with a modest contribution of \$20 or less for those adults falling under 138% of the federal poverty level. In Mississippi, this is about \$17,000 per year for an individual or about \$34,000 per year for a family of four.

Hospital investments and personal premiums from plan members would help fund the needed 10% state share to match the 90% federal share.
